Video of FeNO Symposium - Request your Copy

We filmed the FeNO Symposium held at the Woolcock Institute of Medicine on Thursday 30th July.

You can obtain a copy of the FeNO Symposium by simply replying to this email or alternatively you can watch the FeNO Symposium online at the link below.

The topics covered in the symposium are as follows:

Improving Management of Asthma: A Clinical Update on FeNO

*Recent FeNO guidelines and recommendations - Professor Mike Thomas

*Using FeNO to target ICS therapy in asthma and cough - Professor Peter Gibson

*Current and potential future use of exhaled nitric oxide and pathway-related metabolites as disease markers in children - Joerg Mattes, Professor and Chair of Paediatrics

[Watch the FeNO Symposium online here.....](#)

Introducing NIOX VERO Airway Inflammation Monitor

As an introductory offer we are waiving the cost of the NIOX VERO FeNO (normally \$1800 + GST) when you purchase a 300 Starter Kit.

We have extended this offer until the 30th of September 2015.

NIOX VERO® is a point-of-care device for assessing airway inflammation in patients with respiratory problems such as asthma.

NIOX VERO is a further development of NIOX MINO®, the most widely used device for measuring airway inflammation in clinical practice and clinical studies all over the world.

The NIOX VERO replaces the NIOX MINO and the major advantages are as follows:

* On-Screen Patient Incentive * In-Built Battery for Portability. * Quick analysis time, approximately one minute. * Quick start-up time.

FeNO (Fractional exhaled Nitric Oxide) testing with NIOX VERO offers individualised asthma management that can improve the treatment and care of patients.

To take advantage of this offer or to take the FeNO Challenge and trial the NIOX VERO in your clinic simply reply to this email.

For further information on FeNO click on this link.....

iCO Personal Smokerlyzer

Introducing iCO the world's first Personal Smokerlyzer breath CO monitor that connects to your smartphone.

Ideal for in-depth stop smoking advice delivered by:

* Stop smoking services * General practice * Pharmacies

The iCO Smokerlyzer enables you to test your breath CO level anywhere, anytime.

Readings are instantly downloaded to your personal profile on the iCO Smokerlyzer app to see how you are doing in your attempt to quit smoking.

The iCO Smokerlyzer can be connected using the earphone connector on your smartphone and can easily interface with your own Smoking Cessation app if required.

For further information on the iCO simply reply to this email.

New Look Micro and piCO Smokerlyzers

Introducing the "New Look" Micro and piCO Smokerlyzers from Bedfont.

The new piCO and Micro Smokerlyzers come with additional features compared to the old models:

* Large Screen * Brand new easy to use interface * Maintenance reminders * Steritouch technology * Ambient testing for Micro only

Smokerlyzers are a range of breath CO monitors and testers which measure the small amounts of CO in exhaled breath. The more a person smokes, the higher their CO reading will be.

The reading is given in ppm, which is the number of CO molecules in a million parts of air. The ppm reading can also tell you how much CO is in the blood (the %COHb) reading). %COHb is the percentage of red blood cells carrying CO instead of oxygen.

The amount of CO in an unborn baby's blood is referred to as %FCOHb (percentage of foetal carboxyhaemoglobin). Some of the Smokerlyzer range can analyse %FCOHb as an incentive to stop smoking and comply with new NICE guidelines for smoking in pregnancy.

For further information on the Smokerlyzers simply reply to this email.

Australasian Society of Clinical Immunology and Allergy (ASCIA 2015) Adelaide

Visit us at the ASCIA 2015 Conference, Adelaide Convention Centre, 9-12 September 2015.

We will be displaying the following products at Stand 27:

- NIOX VERO - FeNO (Fractional Exhaled Nitric Oxide)
- EasyOne and Easy on-PC Spirometers
- EasyOne Pro LAB - Spirometry, Bronchial Provocation, DLCO and Multi-Breath Nitrogen Wash
- LiteAire - Disposable Cardboard Spacers (MDI Holding Chambers)

ASCIA 2015 Conference Adelaide website.....

ERS International Congress 2015 Amsterdam

We will be attending the ERS International Congress to be held in AMSTERDAM Netherlands, 26-30 September 2015.

Visit us at the ndd Booth 3.A_07 Hall 3 where you will see the EasyOne Spirometry range and the EasyOne Pro LAB which features a Multi-Breath Nitrogen Wash, DLCO Measurements, Spirometry and Bronchial Provocation.

Visit us at the Aerocrine Booth 3.B Hall 3 where you will see the new NIOX VERO FeNO (Fractional Exhaled Nitric Oxide) and be invited to measure you own FeNO and find out how you can take the FeNO Challenge in your practice.

**Simply reply to this email if you would like to make contact with us at the ERS Congress in Amsterdam.

Get the latest EasyWare and EasyWare Pro

Get the latest EasyWare and EasyWare Pro Software

The EasyWare software for the EasyOne spirometer and the EasyWare Pro software for the Easy on-PC and the EasyOne Pro DLCO system are periodically upgraded and you can download the latest software free of charge from the manufacturer's (ndd Medical Technologies) website at <http://ndd.ch/index/downloads-software>

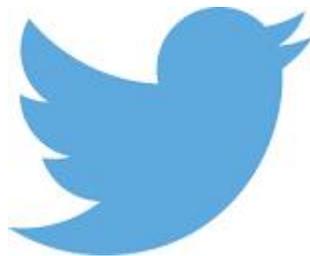

These software downloads are executable files so if you work in a Hospital or a Government agency please make sure you have an IT person present to download and install the software as these type of files require administrator permission.

Once you have downloaded and installed the latest EasyWare software you should then connect your EasyOne spirometer to your computer and run the EasyWare software as this will also update the internal software in your EasyOne Spirometer.

If you require any assistance please telephone us on 1300 136 855.

Go to the EasyWare software page here.....
